

THE NO TWO ALLEZ, ALLEZ! TIME TRIAL COURSE

Fancy a race against the clock over a short but very challenging course? This is for you!

Devised by David Ward from No Two Cycles, and first ridden in anger as a handicap Time Trial in April 2020, we'd love to know your time once you set it! We strongly suggest you make your attempt early or late in the day and when roads are dry and visibility is good: traffic will thus be lighter and conditions safer.

- Your startline is the Pedestrians Crossing sign (just up the road from our main entrance gate, turning left out of the gate). We'd recommend a standing start for authenticity and added challenge. We'd also definitely recommend a warm-up first as you're going to be working hard and climbing almost straight away.
- Follow the undulating road before you start to climb up through the wooded section. Keep going (good views of Castle grounds on your left) until T junction at the top with the sawmill / woodyard ahead of you.
- Turn left and descend with care into Knipton village. Watch for gravel and (during our TT) dozy pheasants.
- Proceed straight through Knipton, leaving the village with cricket club on your left and head into Harston – there's a challenging climb before you enter this village.
- Turn left in Harston and another slight climb before the challenging descent into Woolsthorpe By Belvoir. Take extreme care here as a) there's a left hand bend for which braking is required and b) there are parked cars and oncoming traffic to be aware of when descending through Woolsthorpe.
- Passing the Chequers Inn on your right, turn left at the crossroads towards Belvoir. This is a steady and consistent climb of significant duration but with a fabulous view of the Castle as your reward.
- On cresting the hill (past the Weddings & Conferences entrance to Belvoir Castle on your left), you're almost done! Be very vigilant when passing 'our' entrance (there is often traffic exiting and entering the car park) before crossing the finish line.
